

PRESS RELEASE

Espacio Amplio and the European Federal Party reach an agreement to participate as a coalition in the European Elections.

Both political formations agreed to work for the union of the left to develop a Government Program that primarily favors the social classes with low incomes, so that they are not the most affected by the economic crises of recent years.

Only by achieving a BROAD SPACE, inspired by the successful model of the Broad Front of Uruguay and the 15M Movement, will it be possible to once again excite thousands of people who today are demotivated and demobilized by the internal struggles of the current left-wing political formations.

Espacio Amplio is committed to carrying out the transformation of the Spanish State into a fairer, more social and humane society, so that people regain control of their existence and can lead a healthier and happier life. It was born to integrate political parties, associations, groups, unions, etc., and for this it is necessary to change the representative political system for the system of direct democracy. There is no democracy, there is democratization. The electronic information revolution and social networks are not in themselves an unconditionally favorable instrument for development.

of participatory democracy, although they are opinion-creating engines. The information revolution and social networks will be tools to facilitate the political system of direct democracy.

Society's disaffection with the political groups represented in parliaments becomes more evident and noticeable every day. It is necessary for political parties to regain contact with society, taking into account its priorities and needs.

There is no democracy without parties, but there are parties without democracy. We find ourselves in a moment in which there are parties without democracy. When there are crises, politicians do not suffer them because they have guaranteed income unlike the popular classes. As is evident from the citizens, they are left without jobs, they cannot pay for electricity, gas, their apartment is evicted, etc.

PRESS RELEASE

The commitment of **Espacio Amplio and the European Federal Party** is to work to carry out the following points:

a) Citizen Initiative, which will allow signatures to be collected and a bill to be presented to Parliament so that a law on the subject specified in the initiative can be enacted, if the majority of citizens vote for it in a referendum.

b) Optional Referendum, on a law enacted that citizens see as an attack on their rights and freedoms. If the referendum is voted in favor by a simple majority, then the law will be annulled or withdrawn.

c) Mandatory Referendum, on certain important issues such as, for example, joining international organizations and to avoid wars.

d) The fundamentalism of the exclusivity of representation will be combated.

The parties, through their candidates in the elections, will be the workers, who are elected for that purpose. Furthermore, they will have to get used to dialogue in the pursuit of general and non-partisan interest. In parliament they must enter in search of consensus and enact laws with which citizens have their existence under control and allow them a healthier and happier life.

e) Agreements will be promoted with other left-wing parties based on the principle of depolarized pluralities. Political parties will have to make an effort to dialogue among themselves to create consensus so that the laws they promulgate are in accordance with the demands of society and its interests and do not deprive citizens of freedoms. If they do not do so, citizens will make use of the popular initiative or the optional referendum, which are the basic tools of direct democracy.

We are willing to launch LARGE SPACE so that **everyone** _____
together let us carry out the ratification of a Federal Constitution in all the States of the European Continent that allows the development of a possible foundation of the Federated States of Europe.

April 4, 2024, WIDE SPACE – EUROPEAN FEDERAL PARTY
